

TREATMENT HEALTH & SAFETY GUIDELINES

Face masks

To perform your treatments I will be wearing copper infused face masks. Copper fabrics infused with copper ions are scientifically proven to be antimicrobial, which means anti-viral, anti-bacterial and anti-fungal.

Please wear your OWN mask to appointments and pop it on before entering the property.

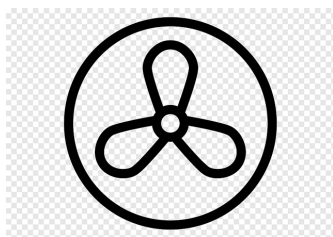

Hand washing

Everyone will be asked to wash their hands, for at least 20 seconds, on arrival into the property. There will be disposable towels for you to dry your hands on. We will be wearing clean gloves for all treatments.

Disinfecting

We will be disinfecting all of our tools and surfaces with Mundo for professional. This has been manufactured to the highest of standards and conforms with the latest directives. The Mundo Professional range provides effective control against a vast range of harmful pathogens including Coronavirus (including SARS and MERS), MRSA, E-Coli, C-Diff, TB, Hepatitis C, Noro virus and Staphylococcus Aureus, Mundo Professional is ideal for aesthetics, beauty, bioresonance, chiropody, dentistry, healthcare, nursing, optometry, and other areas where a high level of hygiene is required.

Ventilation

The back door and window will be left open to allow for ventilation during treatments. Desk top dust extractor fan is also used when working with enhancements.

Disposables

All items such as nail pads, removal foils, desk tissue, nail files, birch wood sticks, disinfectant wipes, disposable aprons, shoe covers (for mobile treatments), gloves, pedicure pads, spatulas, and all other disposable items will be placed in a metal lidded bin containing a liner and disposed of in the dustbin after each treatment in a sealed bag. Disposables will be placed in a sealed bag during mobile treatments. This bag will then be fully sealed and placed in a dustbin as I leave your property.
